## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a security identification system for providing information regarding subjects to be identified, classified in class 382, subclass 115.
  - II. Claims 7-11, drawn to a personal identification system comprising a headset that may be worn by a screener including a micro display, classified in class 345, subclass 8.
  - III. Claims 12-14, drawn to a biometric data acquisition system, classified in class 340, subclass 5.53.
  - IV. Claims 15-19, drawn to a method of checking whether a person is a high-risk individual, classified in class 704, subclass 273.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a security identification system comprising biometric data input means and biometric analysis means; invention II has separate utility such as a personal identification system comprising a headset that may be worn by a screener including a micro display, and a headset processor for transmitting processed image data to a central facility; invention III has separate utility such as a biometric data acquisition system comprising a unit that may be worn by a screener including a miniature camera; and invention IV has separate utility such as a method of checking whether a person is a

high-risk individual by taking a picture responsive to a keyword and forwarding the picture to a central facility for analysis. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even if the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan J Hesseltine whose telephone number is 703-306-4069. The examiner can normally be reached on Monday - Friday, 8:30 AM - 5 PM.
